Chinese Fertility Program

A Unique Approach to Fertility Care

San Diego Fertility Center® is a nationally recognized, state-of-the-art infertility clinic with specialists who work closely with patients from around the world. For over 10 years we have provided unprecedented care and personalized treatment plans, and we have enjoyed creating miracles for those who dream of becoming parents. Because our practice is not affiliated with a larger institution, we are able to work dynamically to acquire the best technology and the most advanced medical treatment options available. This independence also allows us to design creative financial plans that give more patients access to the fertility treatments they need.

Connecting with the Chinese Community

Dr. Chuan is Double-Board Certified and Fluent In Mandarin and English

San Diego Fertility Center regularly welcomes patients from across the United States and around the world. Part of what makes us a global leader in infertility treatment is our dedication to caring for non-English speaking patients. This includes developing a program to coordinate travel to the center, and providing top infertility specialists who can communicate directly with patients in their native language. Dr. Chuan came to the United States with her family when she was 8 years old and is fluent in both English and Mandarin. She is double-board certified in Obstetrics & Gynecology and Reproductive Endocrinology & Infertility and provides exceptional care to patients from a variety of backgrounds – including Chinese and Mandarin speaking patients. She enjoys being able to offer compassionate care to those individuals and couples who might not otherwise have access to fertility treatments due to language barriers.
