

DESIGN AND CONSTRUCTION MANAGEMENT IS NOW PATIENT ARCHITECTS

Welcome to Patient Architects, a design firm dedicated to creating workplaces that enhance healthcare delivery.

Patient Architects is a leading healthcare design firm with deep expertise in outpatient facilities and specialty practices. We help administrators, medical practitioners and patients by creating workplaces that advance practice, delivery and wellbeing.

In 2015, we turned our focus inward to strategically look towards the future. We realized that over the years we've developed a deep niche in the design of critical spaces in healthcare facilities—things like cancer treatment, diagnostic and imaging centers, surgical centers, and specialty practices—in addition to more general medical spaces such as waiting rooms, exam rooms and administrative spaces. So rather than remain a general architectural practice, we've decided to dedicate our services 100% to healthcare design.

At Patient Architects, we believe that well designed environments play an important role in healthcare delivery and patient healing. With our new focus on healthcare design, we are committed to advancing that role.

We are also positioning ourselves for the future. This includes continuing to do what we love to do – working with doctors, administrators and staff to create patient-focused healthcare environments – and we have some exciting new plans in the works to meet the growing needs of the healthcare market. We invite you to visit our new website to learn more at <http://www.patientarchitects.com>.
